**REQUIRED FINDINGS:**

**Prepared By:**

Zac Hilton  
Streets & Storm  
Drain Manager

**NOTES/COMMENTS:**

**RECOMMENDATION:**

Staff recommends that the City Council awards the 2016 High Density Mineral Bond Project to Holbrook Asphalt Company in the amount of \$167,250.00 and authorizes the Mayor to sign the contract.

**BACKGROUND:**

Eagle Mountain City posted a request for proposals for 1,000,000 sq/ft of High Density Mineral Bond (APWA specification 32 01 13.68). High Density Mineral Bond is a seal coat applied to roadways where minimal oxidization has occurred. This product will be applied to subdivision areas with asphalt in good condition with a PCI rating of 80 to 100 and low to moderate traffic volume. The intent of the application is to maintain roadways before significant stress has occurred to the pavement.

The application areas receiving this treatment are the following subdivisions: Evans Ranch, Meadow Ranch, Valley View and SilverLake. The work will be completed before mid-September.

Holbrook Asphalt Company was the single bid to install the HA5 product, which meets the APWA specifications.
